

CATARACT POST-OP INSTRUCTIONS

1. Use drops as instructed:

Tobramycin/dexamethasone: (shake) One drop in the operated eye 3 times daily until empty.

Nonsteroidal anti-inflammatory drop: One drop in the operated eye once per daily until empty.

***If eyes become sensitive to light, scratchy or red shortly after completing the drops, more drops are needed and both bottles should be refilled and used until empty.**

2. Do not rub your eye.

3. Wear the protective shield when sleeping or napping.

4. Wait 3 to 5 minutes between drops when using them at the same time.

5. Come into the office IMMEDIATELY if you have a sudden increase in pain or decrease in vision.

6. PLEASE BRING ALL DROPS WITH YOU TO EVERY FOLLOW-UP VISIT.
