

DSAEK POST-OP INSTRUCTIONS

1. Use drops as instructed:

TobraDex: (shake) One drop in the operated eye 4 times daily for one month, then substitute Prednisolone 4 times daily (DON'T STOP).

Nonsteroidal anti-inflammatory drop: One drop in the operated eye once per day for one month, then STOP.

2. Remain lying down on your back for 48 hours after surgery.

3. Do not rub your eye.

4. Wear the protective shield when sleeping or napping.

5. Wait 3 to 5 minutes between drops when using them at the same time.

6. Come into the office IMMEDIATELY if you have a sudden increase in pain or decrease in vision.

7. PLEASE BRING ALL DROPS WITH YOU TO EVERY FOLLOW-UP VISIT.
